

Identification Services Bureau is Certified to Information Security Management System Standards

The Identification Services Bureau was certified to Information Security Management System BS7799 by the British Standards Institution in January 2006. With high level of proficiency in the Information Security Management System, this Bureau made a transition to meet the standard of ISO27001:2005 and was certified to ISO27001:2005 by the British Standards Institution on 4th May 2007.

In 2013, the British Standards Institution released new version standards, ISO27001:2013, which raised the requirements of the system. Also, this Bureau was successfully certified to the Information Security Management System ISO27001:2013 in 2015.

This Bureau applied the information security management system to the businesses of electronic identity card, travel document and criminal record and established a management system which is compliant with ISO27001 standards. This Bureau will continue to make improvement in order to attain the advanced information security management level in the world, and thus ensure that this Bureau can effectively cope with and manage the risk in information security, rigorously monitor the document production process and protect the personal information of citizens.
